Expressive E introduces the GForce Collection: MAP and Prophet~5 reimagined for expressive performance

Two radically different GForce synthesizers come together in one expressive collection, each enhanced with 250 MPE presets crafted by Expressive E.

Marseille, France
Tuesday, November 3rd, 2026

Expressive E announces the **GForce Collection**, bringing together two distinctive GForce synthesizers – MAP and Prophet~5 – reimagined through expressive sound design.

From MAP's open-ended modular exploration to the unmistakable analog character of the Prophet~5, the Collection brings two contrasting approaches to synthesis into a single expressive ecosystem. Expressive E has crafted **250 dedicated MPE presets for each instrument**, designed to turn pressure, pitch and timbre gestures into an integral part of the sound.

The **MAP Expressive Suite** and **Prophet~5 Expressive Suite** are also available individually, while the GForce Collection combines both synthesizers and all **500 exclusive MPE presets** at a preferred bundle price.

The GForce Collection and both Expressive Suites are available exclusively on expressivee.com.

Two synths. Two expressive worlds. One collection.

MAP and Prophet~5 approach synthesis from almost opposite directions.

MAP is built around exploration, movement and transformation, inviting sounds to continuously evolve as they are played. Prophet~5 starts from an iconic analog architecture defined by warmth, immediacy and character.

Expressive E approached each instrument on its own terms, designing sounds in which expressive gestures do more than modulate parameters: they become part of the performance itself.

Together, the two instruments span a wide territory, from evolving textures and generative movement to expressive analog basses, leads, keys and pads.

MAP Expressive Suite

Venture into a deeper world of sound

The **MAP Expressive Suite** combines GForce MAP with **250 exclusive MPE presets crafted by Expressive E**, turning its exploratory synthesis architecture into an instrument built around movement, discovery and expressive transformation.

Each preset invites the player to move beyond its initial state, using per-note pressure, pitch and timbre to reshape texture, modulation, rhythm and harmonic content in real time.

Three curated banks. Three paths through MAP.

COMPASS — analog warmth points the way
Rounded basses, glowing pads and expressive leads explore MAP's warmer, more

immediate side.
82 presets

WANDERLUST — leave familiar sound behind
Waveshaping, FM and deep modulation unfold into fluid textures, animated timbres and unexpected forms.
82 presets

LABYRINTH — colour bends. time folds. space opens.
Colour, Time and Space reshape sounds into shifting atmospheres, intricate sequences and immersive textures.
86 presets

Prophet~5 Expressive Suite

A new expressive dimension for an analog icon

Developed by GForce Software in collaboration with Sequential, Prophet~5 brings the character and immediacy of the legendary polyphonic synthesizer into software.

The **Prophet~5 Expressive Suite** pairs it with **250 exclusive MPE presets crafted by Expressive E**, using per-note pressure, pitch and timbre to introduce new movement, articulation and nuance while preserving its unmistakable analog identity.

Three curated banks exploring the Prophet~5's emotional legacy

MELOMANIA — classic tones, beautiful unrest
Timeless Prophet character meets wistful keys, dramatic pads and expressive leads.
83 presets

RECKLESS — analog warmth, stripped of polish
Darker, rougher sounds built around gritty basses, detuned stacks and raw analog tension.
83 presets

AFTERGLOW — the sound that lingers after the moment
Shimmering keys, suspended pads and distant textures explore the Prophet~5's more reflective side.
84 presets

Designed for Osmose and any MPE controller

Every preset in both Expressive Suites has been sculpted for **Osmose**, whose three-dimensional keybed allows subtle gestures to continuously shape each sound.

Both Suites are also fully compatible with other MPE controllers, including Ableton Push 3, ROLI Seaboard, LinnStrument and other expressive instruments.

Collaboration with GForce Software

The GForce Collection continues Expressive E's work with leading software developers to bring deeper expressive control to distinctive synthesis engines.

GForce Software has spent decades recreating and reimagining influential electronic instruments, while developing original synthesizers with their own identity. This

shared focus on musicality, immediacy and character made MAP and Prophet~5 natural candidates for the Expressive Suite format.

"*Expressive E has a unique ability to bring more expression out of an instrument while staying true to what makes it special. Their work with MAP and Prophet-5 deepens the connection between player and sound, adding new levels of nuance, immediacy and playability without compromising the distinct character of either instrument.*" Jerome, CEO at GForce Software

Availability and pricing

The MAP Expressive Suite, Prophet~5 Expressive Suite and GForce Collection will be available exclusively on expressivee.com with introductory pricing.

GForce Collection (MAP and Prophet~5) + 500 Expressive E presets
Both G-Force instruments and all 500 Expressive E presets
119$/€ instead of €238$/€

MAP or Prophet~5 plugin + 250 Expressive E presets
Buy MAP or Prophet~5 at its standard price and get the full 250-preset Suite included.
71,40$/€ instead of 119$/€

Complete 250-preset pack
The full MPE sound bank crafted by Expressive E.
35,99$/€ instead of 59,99$/€

Individual bank purchase
Choose one of the six banks
17,99$/€ instead of 29,99$/€
